Passportal

SolarWinds® Passportal Site™
Branded Password Management as a Service (PMaaS)

SolarWinds Passportal Site enables MSPs to resell the Passportal password- management solution they use to their end clients. Site provides the ability to easily and safely share passwords for your customers in a co-managed IT environment, and is an incremental service revenue opportunity for you.

### Offer the time savings and threat protection you enjoy with SolarWinds Passportal—to your clients.

» Arm your customers with military-grade encryption and credential handling with your own branded version of Passportal

» Provide end users a place to centralize both corporate and personal passwords

» Let customers enjoy the ease of one-click website login and strong, automatically-generated passwords

Help improve overall security by encouraging your clients to use a password management solution that enforces best practices.

» Enable customers to auto-expire customer passwords and generate new "strong" passwords with ease

» Allow customers to centrally manage their employee data access rights

» Help make it easy for clients to terminate system access when employees leave the company

Extend your services product menu by offering Passportal password management as a service to your clients.

» Differentiate your business; only Passportal customers can extend this service to their clients

» Add your brand and create your own custom service URL—a great way to reinforce the value you bring to your clients every time they use the service

FEATURES AT A GLANCE

Password management convenience for your clients

» No more remembering dozens of passwords

» Faster access to websites and applications

» Centralized system for both corporate and personal passwords

» Folders to organize and categorize credentials

» Automatic generation of audits and reports to help with tracking and compliance

Improve the security you provide by promoting a password management system you trust

» Help ensure your customers frequently rotate passwords and use strong password strings to thwart hackers

» Receive notification of all passwords of departing employees so clients can remove their access to company systems

» Give clients the tools to granularly grant employee access to employee systems and networks

» Help clients meet compliance measures with comprehensive auditing and reporting capabilities

Create a new password-management-as-a-service revenue stream for your business

» Simple to sell—after all, it's the same service you trust to protect your business

» Adding your brand is easy, and since clients will use the service daily, your value as a vendor will be consistently reinforced

Ease of use with mobile app and browser extensions

» Users can access their Site credentials quickly and easily through the native mobile apps on iOS® and Android®, with a rebranded interface, auto-fill to log in to websites, and apps on mobile devices

» Cross-browser extension for Google® Chrome®, FireFox®, Edge, and Chromium-based browsers

» Rebranded interface, auto-login, auto-fill, and auto-capture for password saving

SolarWinds is a leading provider of powerful and affordable IT infrastructure management software. Our products give organizations worldwide, regardless of type, size, or IT infrastructure complexity, the power to monitor and manage the performance of their IT environments, whether on-premises, in the cloud, or in hybrid models. We continuously engage with all types of technology professionals—IT operations professionals, DevOps professionals, and managed service providers (MSPs)—to understand the challenges they face maintaining high-performing and highly available IT infrastructures. Targeted for MSPs, the SolarWinds MSP product portfolio delivers broad, scalable IT service management solutions that integrate layered security, collective intelligence, and smart automation. Our products are designed to enable MSPs to provide highly effective outsourced IT services for their SMB end customers and more efficiently manage their own businesses.
